PROFESSIONAL EXPERIENCE

Globoconsult LLC

New York, NY

Project Management & Operations Associate

June 2026 - Present

- Managed end-to-end operations for a \$5M+ institutional event, coordinating vendor logistics, venue operations, compliance verification, and on-site execution for 50+ attendees.
- Architected an automated CRM/data pipeline (Make.com + AI), eliminating manual data entry and improving operational data reliability across the client relationship database.
- Directed vendor sourcing and cost-benchmarking across a commercial workspace vendor landscape, evaluating pricing, terms, and operational fit to inform a firm expansion decision.
- Built repeatable operational workflows for recurring institutional programs, including partnership onboarding and event logistics processes.

CX by Design

New York, NY

Project Manager

May 2025 - June 2026

- Orchestrated 3 concurrent, cross-functional project teams of 4–5 members each, utilizing Asana to manage dependencies and ensure 100% on-time delivery of client journey workflows.
- Facilitated high-level stakeholder communication with executive leadership to translate business objectives into tactical project scopes, improving alignment on client-facing deliverables.
- Spearheaded AI-driven pressure-testing for strategic workflows, proactively mitigating risks and reducing scope creep prior to final leadership approval.
- Developed repeatable system designs for sales pipelines and client experience frameworks, enabling the firm to scale high-touch consultancy services into product-led outcomes.

Circler.io

New York, NY

Product & Client Success Analyst

Jan 2025 – Sept 2025

- Managed end-to-end client onboarding for B2B accounts, reducing friction through standardized step-by-step guides and improving time-to-value for AI-powered software users.
- Liaised between Product, Engineering, and Marketing teams using Jira to track feature rollouts, directly reducing recurring support tickets through proactive technical documentation.
- Executed User Acceptance Testing (UAT) and data validation via Python automation, ensuring product quality and technical configuration alignment with client requirements.
- Cultivated client engagement by launching and moderating community spaces, providing real-time support and gathering feedback to reduce churn.

Aflac

Bangalore, India

Quality Analyst (Contractor)

July 2021 – Jan 2024

- Managed planning and delivery of software technology projects using Agile SDLC practices, ensuring that development teams adhered to organizational standards.
- Led cross-functional teams through project execution, ensuring timely delivery and alignment with key milestones.
- Contributed to accessibility compliance by supporting adherence to WCAG 2.0 Level A & AA standards, upholding professional and technical standards.
- Extensive experience coordinating between onshore business teams and technology teams, ensuring seamless communication and alignment on project deliverables
